

Professional Profile

Demonstrates profound knowledge of project operations entailing project planning and integration, resource utilisation, and risk management. Highly skilled in the management, design, and procurement of functions for large construction projects. A recognised leader with the ability to manage cross-functional project teams during the project development cycle, building robust relationships with stakeholders and contractors to achieve project deliverables and milestones. Focused on the successful management of processes, tools, and reporting solutions to enable greater organisational efficiency and compliance with HSE requirements and regulations.

Core Skills

- Project management
- Construction management
- Engineering management
- Civil/industrial buildings
- AutoCAD
- Risk management
- Quality management
- Contract management

Career Summary

May 2008 – Present ABC Project Management, Doha, Qatar

Civil Site Engineer

Outline

Facilitating the construction activities for the Qatar Foundation Stadium, home of the FIFA 2022 World Cup, and various other multi-purpose sports halls.

Key Responsibilities

- Providing reliable supervision to control and approve on-site construction activities.
- Collaborating with the QA/QC Engineer to conduct site inspections in line with approved test plans.
- Monitoring site works to ensure compliance with method statements, project specifications, codes, and safety plans.
- Spearheading civil, structural, architectural, and landscape works, ensuring coordination with other disciplines.
- Ensuring contractor compliance with procedures, specifications, and HSE requirements.
- Conducting risk assessments and job safety analysis to mitigate hazards.
- Reviewing contractor submittals, including method statements, inspection plans, and shop drawings.
- Monitoring construction progress to ensure alignment with the approved schedule.

Key Achievements

- Successfully led the civil engineering activities to complete the detailed engineering design one month ahead of schedule and within the approved budget.
- Awarded the Outstanding Civil Engineering Achievement (OCEA) Award in 2013.

Jan 2005 – May 2008 Consolidated Contractors Company (CCC), Azerbaijan

Construction Engineer

Outline

Orchestrated all construction activities to support the structures for portal monitors and auxiliaries at the Azerbaijan-Armenia border crossings.

Key Responsibilities

- Utilised AutoCAD to draft and evaluate designs, ensuring conformance to construction requirements.
- Coordinated the development of estimates, work packages, safety plans, and risk assessments.
- Defined oversight, quality, and schedule requirements at remote project sites.
- Contributed to the development of the scope of work and schedule of values for

construction activities.

- Strengthened relationships with the external supply chain and internal project teams.
- Oversaw the construction of border crossings, radar site installations, and identification of setup defaults.

Education

- Masters in Civil Engineering – Faculty of Engineering & Technology, Cambridge University
- Project Management Professional (PMP) – PMI USA – License No. 00000000
